TELEPHONE MESSAGES & IVR

Most IVR projects & on-hold messages are under 20 messages/prompts to record and fall under minimum pricing, However; if there are lots of individual numbers, letters, names or dates to record and edit in different intonations this can take extra time in the studio. Due to the start/stop nature of telephone prompts I can record about 1000 words / 50 messages per hour. For number/date sets it's around 200-300 an hour.

BASIC SESSION FEE	\$100 PER HOUR
POST	\$50 PER HOUR

VIDEO GAMES & ANIMATION

Rates for video games and animations can vary significantly. An integral character for an AAA game console will cost considerably higher than a budget PC game. The time required to record the character voices is also difficult to estimate in advance, it depends on the amount of direction given and whether the audio is being recorded wild or with time constraints. For a character with less than 100 lines/ 1000 words the fees are as follows:

BASIC SESSION FEE	\$200 PER HOUR
POST	\$60 PER HOUR
USAGE	\$100 FIXED RATE

AUDIO BOOKS

Audio books are usually recorded and edited by the voice talent. The average book is 80,000 words and will take around 5-7 days to record and edit.

COMMERCIALS ONLINE, TV & RADIO

Commercials for online, TV and radio include usage fees in addition to recording. A local or short run campaign is about 100% BSF. Regional campaigns are 400% BSF. National campaigns are 600% per country per year. Similar to online.

CORPORATE VIDEOS & EXPLAINERS

The average corporate video or explainer is 3 minutes in duration. Most just sit on a website or social channel and are not sponsored so usage fee does not usually apply.

LIP-SYNC

Lip-sync audio is extremely time consuming. It takes 4-6 times longer than wild recording and if performing a character role it can take even longer. There are no fixed charges and the fees depend on the length of the script & character style.
